PROFESSIONAL SUMMARY

Computer Science Engineering graduate with experience in python, Android app development using Generative AI, and Cloud Computing. Developed projects including an Android app development and Biometric fingerprint-based electronic voting system. Strong foundation in application development, database management, problem-solving, and integrating modern technologies into practical solutions, real-world systems.

EDUCATION

M S Engineering College, Bengaluru

B.E. - Computer Science and Engineering, CGPA: 8.04

2022 - 2026

Bengaluru, Karnataka

Best PU College, Chikkaballapura

12th Standard, Percentage: 80.1

2020 - 2022

Chikkaballapura, Karnataka

Morarji Desai Residential School, Tirumalapura

10th Standard, Percentage: 84.64

2019 - 2020

Chintamani, Karnataka

EXPERIENCE

Android App Development using Generative AI - MindMatrix

- Completed an Android App Development using Generative AI internship at MindMatrix.
- Designed and developed Android applications using Kotlin, Jetpack Compose, Room Database, and Google GenAI.
- Built AI-powered features for automated quiz generation and offline data management for educational applications.

Cloud Computing - InternZ Learn

- Completed a Cloud Computing internship, gaining practical knowledge of cloud computing concepts and services.
- Learned cloud deployment models, virtualization, storage, networking, and cloud security fundamentals.
- Worked on hands-on tasks involving cloud infrastructure and basic cloud service implementation.
- Enhanced problem-solving, technical, and analytical skills through practical assignments and project-based learning.

PROJECTS

Akshara Deepa Tutor (Android App Development using GenAI)

- Developed an offline-first Android application to help SSLC students track syllabus completion and learning progress.
- Implemented chapter-wise quizzes, progress tracking, and a strength analysis dashboard to identify weak subjects.
- Built the application using Android development practices with local database support for 100% offline access.
- Improved self-learning by providing daily goals, instant progress updates, and personalized performance insights.

Biometric Fingerprint Based Electronic Voting System

Technologies: Fingerprint Authentication, Embedded Systems.

- Developed a secure electronic voting system using biometric fingerprint authentication.
- Implemented identity verification to prevent duplicate voting and improve election transparency.
- Demonstrated the application of biometric technology in secure voting systems.

TECHNICAL SKILLS

Languages: Python, CSS, JavaScript, HTML5, MySQL

Developer Tools: VS Code, Git, GitHub

Microsoft Office: Excel, PowerPoint, Word, Access

LANGUAGES

English - Advanced (Read and Write) | Kannada - Advanced (Read and Write) | Telugu - Advanced (Read)
